**(54) Title:** TRAVEL MONITORING

### Figure 1: How Total Travel Cost Management (TTCM) Works

**(57) Abstract:** A Corporate Travel Management & Cost Consolidation system where each member of the Corporation's Travel Management Team, Corporate Executives and each Corporate Traveler uses a single terminal to view, and analyze Travel and Credit Card information from and to conduct travel and card transactions with two or more GDS, Travel Agency and by Credit Card Companies or other comparable ATDSs, alone or in combination with one or more types of electronic travel and card data. Travel and Credit Card information and processes the transactions are placed into a single integrated format. TravelMaster aggregates travel-booking information from each and every GDS, Travel Agency, and Credit Card Company or other vendors utilized by the corporation, including security, PNR identification, and pricing information. Booked travel and ask prices from participating GDS, Travel Agency, and Credit Card Companies may be integrated into the display. The combined information is displayed to a customer with standard views then sorted by price, volume, and other available attributes as desired by the customer. Each client is forwarded travel and card booking and payment information from only those GDSs, Travel Agencies, and Credit Card Companies that the customer is contracted with and thus entitled to receive.

SE, SI, SK, TR), OAPI (BF, BJ, CF, CG, CI, CM, GA, GN, GQ, GW, ML, MR, NE, SN, TD, TG).
